

# Eagle Scout Projects

## PROJECTS

Every year Freenotes Harmony Park receives many inquiries about incorporating Outdoor Musical Instruments into Eagle Scout Projects. What has worked well and what we can do to help is provide information on fundraising and offer an Eagle Scout discount on our instruments. We have seen successful projects accomplished when the Eagle Scout raises the money and installs the instruments in a community space for all to enjoy.

## 2 FUNDRAISING

You can hold a fundraiser in your community or get local businesses and organizations to sponsor your project. You could also start a kickstarter campaign or consider another fundraising platform for your project.

## 3 INSTALLATION

Installing the instruments is fairly easy and should be able to be done by any Eagle Scout. We can also provide a reference for a completed project if you'd like to contact another Eagle Scout.

## 1 LOCATION

First, find a location that will allow your donation of instruments to be installed, this will determine the scope of the project. Check with local schools, park and recreation departments, libraries, museums and clubs like the Rotary to find a location and gather support for your project.
