These half-size instruments are the toughest we have ever built with aluminum resonators replacing the previous ABS designs. They occupy less space and they require less budget too, making them attractive on many levels. Stands come in two sizes either standard or preschool. Surprisingly delightful, these interactive art sculptures work as educational tools to challenge the imagination by stimulating creativity. Freenotes instruments make it possible for everyone to create beautiful music.

The Weenotes Collection includes Griffin, Piper & Merry NO Substitutions for this price saving package. Please note the photos of our instruments may show slight variations of components.
